

Family Tree of the Churches

Principal Churches in Eastern Europe, the Middle East, India and North Africa

The information graphic provides an overview on the principal churches in Eastern Europe, the Middle East, India and North Africa. Its aim is to facilitate the attribution of the huge variety of churches to which the people coming to Europe belong. The examples given in the graphic are not intended to represent a comprehensive list, and complex issues had to be summarized in a simplified way. The regions indicate the main distribution areas which, however, might be subject to mobility-caused changes.

The Institute of Missiology in Aachen, Germany, supports the academic education of young Christians in Africa and Asia. With your support, we provide scholarships that enable a selection of talented young people to pursue their studies. This helps them to qualify for meeting the future challenges of the African and Asian churches.

Your donations are a sustainable investment towards the solution of many pressing questions as to how to shape the future.
